# SUSE at a Glance

# What Do We Mean by Always Open?

**It's not just WHAT we do.  
It's HOW we do it.**

- True to open source vision
- Flexible and adaptive
- Enterprise support

# Where SUSE Leads

15Y+ 

## Mainframe Linux

Over 15 years of mainframe Linux market share leadership, 80%+

4/5 

## Linux in Finance

4 out of 5 of the world's largest banks use SUSE Linux Enterprise

70% 

## SAP on Linux

70% of all SAP applications running on Linux run on SUSE, 95%+ for HANA

80% 

## Linux in Large Enterprise

Over 80% of the Fortune Global 50 are active SUSE Customers

9/10 

## Linux in Aerospace

9 out of 10 of the largest aerospace companies rely on SUSE

x10 

## Linux in Telecom

10 of the largest telecommunications carriers rely on SUSE

7/10 

## Linux in Pharma

7 out of 10 of the largest pharmaceutical companies use SUSE Linux Enterprise

7/10 

## Linux in Retail

7 out of 10 of the largest retailers in the U.S. are active SUSE customers

x10 

## Linux in Automotive

10 of the largest global automobile mfgs. are active SUSE customers

50% 

## Linux in HPC

Half of the world's 20 largest super computers run on SUSE

7/10 

## Linux in Manufacturing

7 out of 10 world's largest manufacturers use SUSE Linux Enterprise

# Product Portfolio

## Server and Desktop

- SUSE Linux Enterprise Server
- SUSE Linux Enterprise Server for System z
- SUSE Linux Enterprise Server for IBM Power
- SUSE Linux Enterprise Server for SAP Applications
- SUSE Linux Enterprise Server for High Performance Computing
- SUSE Linux Enterprise Server with Expanded Support
- SUSE Linux Enterprise Point of Service
- SUSE Linux Enterprise Desktop

## Server Extensions

- SUSE Linux Enterprise High Availability Extension
- GEO Clustering for SUSE Linux Enterprise High Availability Extension
- SUSE Linux Enterprise Real Time Extension
- SUSE Linux Enterprise Workstation Extension
- SUSE Linux Enterprise Virtual Machine Driver Pack
- SUSE Manager Management Pack for Microsoft System Center
- Long Term Service Pack Support
- SUSE Linux Enterprise Live Patching

## Cloud, Storage and Management

- SUSE OpenStack Cloud
- SUSE Manager
- SUSE Enterprise Storage
- SUSE Studio
- SUSE Linux Enterprise Server for Amazon EC2
- SUSE Linux Enterprise Server for Windows Azure

# SUSE & IBM

## Enabling Advanced Data Center Solutions for More Than 20 Years

- 15 years of collaboration and market leadership for Linux mainframe
  - z, Power, Linux One
- Tight integration between IBM and SUSE engineering
  - 1st Linux based mainframe, 1st KVM support
- SUSE Linux Enterprise Server for SAP Applications is the default distribution for SAP HANA on IBM Power Systems
- Only distribution with z/VM support in SUSE OpenStack Cloud

# SUSE and IBM

- **SUSE Linux Enterprise Software supported on all major IBM Hardware Platforms**
  - SUSE Linux **Enterprise Server** (incl. SAP)
  - SLE **High Availability** Extension
  - SUSE **Manager Client**
- **SUSE Linux Enterprise Server is IBM OS of choice for**
  - IBM Business Warehouse Accelerator
  - IBM High Performance Analytical Appliance
  - IBM DB2 pureScale
  - IBM Retail Solution
  - IBM Watson

# Why SUSE Linux on IBM Power?

- ✓ Leverage existing capital investments
  - Increase data center resource utilization by consolidating assets
  - Reduce software licensing expense
  - Avoid vendor lock in
- ✓ Enterprise quality maintenance
- ✓ Vast support ecosystem
- ✓ Industry standards
- ✓ Collaborative development
- ✓ Linux is a logical technical transition from Unix
- ✓ Leverage existing Unix management skills and expertise

# SUSE Linux Enterprise Server for IBM Power

- Native support for POWER7 and POWER8
- Support for Hardware RAS features
- Active memory sharing, NPIV
- Dynamic reallocation for DLPAR
- KVM virtualization included, PowerVM, PowerKVM
- Free access to openSUSE Build Service on POWER
- OS of choice for SAP HANA on IBM POWER (+ HA certified)
- High Availability for DB2, Websphere MQ, ...
  
- Soon
  - Native support for POWER8 Little Endian
  - Full Snapshot and Rollback for btrfs filesystem
  - MariaDB 10 included
  - Kernel Live Patching

**36+ Published benchmarks for SUSE Linux Enterprise  
on IBM Power**

# Power Linux Market Solutions

1

## Open Source Infrastructure Services

<http://www.suse.com/products/server/features/mission-critical.html>

2

## SAP on Linux

<http://www.suse.com/partners/alliance-partners/sap/>

3

## Watson, Hadoop and HPC

<http://www.suse.com/products/server/hpc.html>

## Workload Candidates

### Best Fit Applications

- Leverage strengths of IBM Power:
  - High availability
  - High I/O bandwidth capabilities
  - Parallel Processing applications

### Examples:

WebSphere	Java
Application Server	Big Data
SAP	Insights/Streams
Cognos	TSM
Informix	

---

### Good Fit Applications

- Optimized for SUSE Linux Enterprise Server, incl. x86
  - Development and test
  - Application availability on Linux
  - Strategy within the organization

### Examples:

- DNS, DHCP
- Rational
- Messaging Broker
- Apache Web Server
- Samba
- FTP, NFS, file and print, etc.

# Benefits of a Paid Subscription

- Timely, tested and guaranteed security updates
- Prompt resolution of support issues
- Patches that preserve application compatibility
- Hardware and software certifications
- Technology Assurance Program indemnification

**Result:** Allows your staff to focus on  
**more valuable strategic initiatives**

# Why SUSE for SAP on Power ?

## Unrivalled Relationship Making SUSE the Smart Choice for SAP Workloads

- 17+ years of joint testing and development at the SAP LinuxLab
- Joint collaboration on Cloud Foundry
- SUSE Linux Enterprise is the leading platform for SAP workloads on Linux
- Seamless support from SAP and SUSE
- SUSE Linux Server for SAP Applications delivers built-in high availability, superior performance and security
- First and leading OS for SAP HANA
- The platform powering SAP HANA Enterprise Cloud
- SUSE OpenStack Cloud powers SAP's HANA Cloud Platform

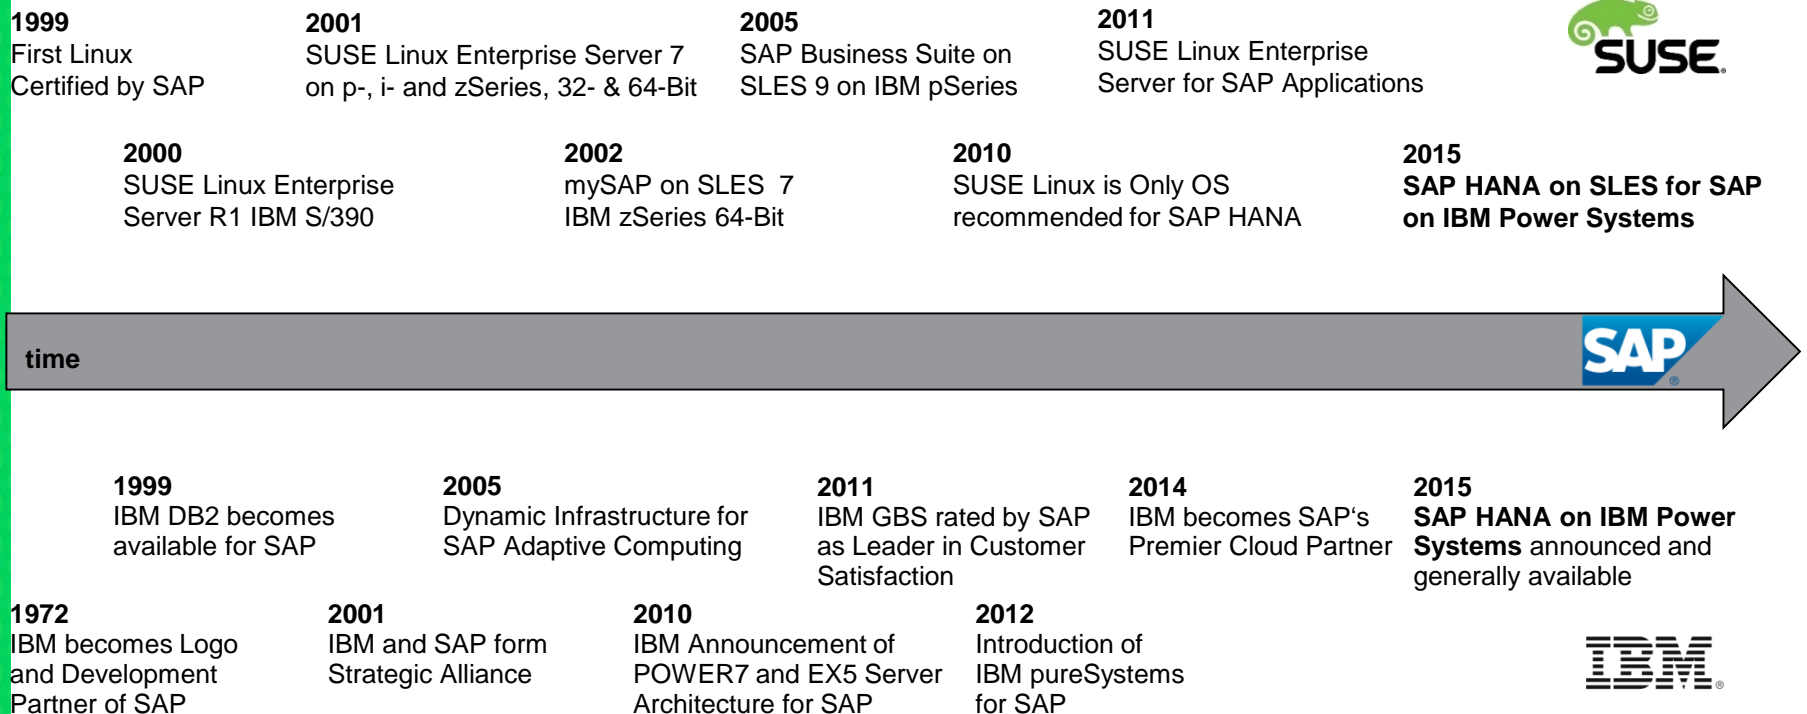

# Why SUSE Linux Enterprise for SAP?

- **Close Engineering and Technology Partnership with SAP**
  - SAP's Software Development Reference Platform for UNIX and Linux
  - Supports all major SAP Workloads
- **Proven Platform with Excellent Customer References**
  - >4,000 SAP customers run on SUSE Linux Enterprise
  - Runs SAP HANA and SAP Cloud Solutions
- **Exceeds Mission Critical Application Requirements**
  - First Linux distributor to certify HA extension for integration with SAP NetWeaver
  - Validated Best Practices Guides developed with SAP Linux Lab
  - Certified and validated Live Patching for SAP HANA

# SUSE, SAP and IBM working together to deliver customer solutions

## Milestones

## SUSE and IBM offer a solution for fast and reliable SAP analytics

Reduce the time and effort  
for system set-up

Mitigate business impact  
with fast disaster recovery

Optimize performance

Simplify lifecycle  
management

# SUSE Linux Enterprise Server for SAP Applications benefits

**Leading platform for SAP solutions on Linux**  
**Recommended and supported OS of choice for SAP HANA**

**You will benefit from ...**

- ✓ Improved performance
- ✓ Improved uptime
- ✓ Flexible cloud options
- ✓ Shorter deployment times
- ✓ Optimization for SAP HANA
- ✓ Extended Support option
- ✓ Integrated support from SAP and SUSE
- ✓ Validated stack that eliminates the risk of incompatibility issues
- ✓ Support for large workloads

# SUSE Linux Enterprise Server for SAP Applications

- 70% reduction in TCO for a fashion retailer
- 99.99% server uptime for a glass manufacturer
- 60% performance boost for a warehouse control system

# SLES for SAP Applications 12SP1

## Increase the uptime of mission-critical SAP workloads

### Rollback on service pack upgrade

Full System Rollback for better resiliency (take snapshots of the system, including the kernel files, and roll back if needed). Minimize risks and allow for rollback when upgrading.

### Docker

Automates the deployment of applications inside software containers by providing an additional layer of abstraction and automation of OS-level virtualization on Linux.

Supported in SUSE Linux Enterprise Server 12 SP1 for SAP Applications for virtualization with non-SAP applications.

### Built-in business continuity

SUSE Linux Enterprise for SAP Applications 12 SP1 extends the HA capabilities for SAP HANA, including the capability to run SAP HANA with high availability on the Amazon Web Services public cloud.

ClusterTools2 verifies that cluster configurations are set up correctly.

# SLES for SAP Applications 12SP1

## Increase the uptime of mission-critical SAP workloads

### Innovation for SAP HANA

SUSE developed the first automated system replication solution for SAP HANA database failovers. SAP HANA Firewall to secure and fence off SAP HANA databases is also fully supported.

### Simplified operations

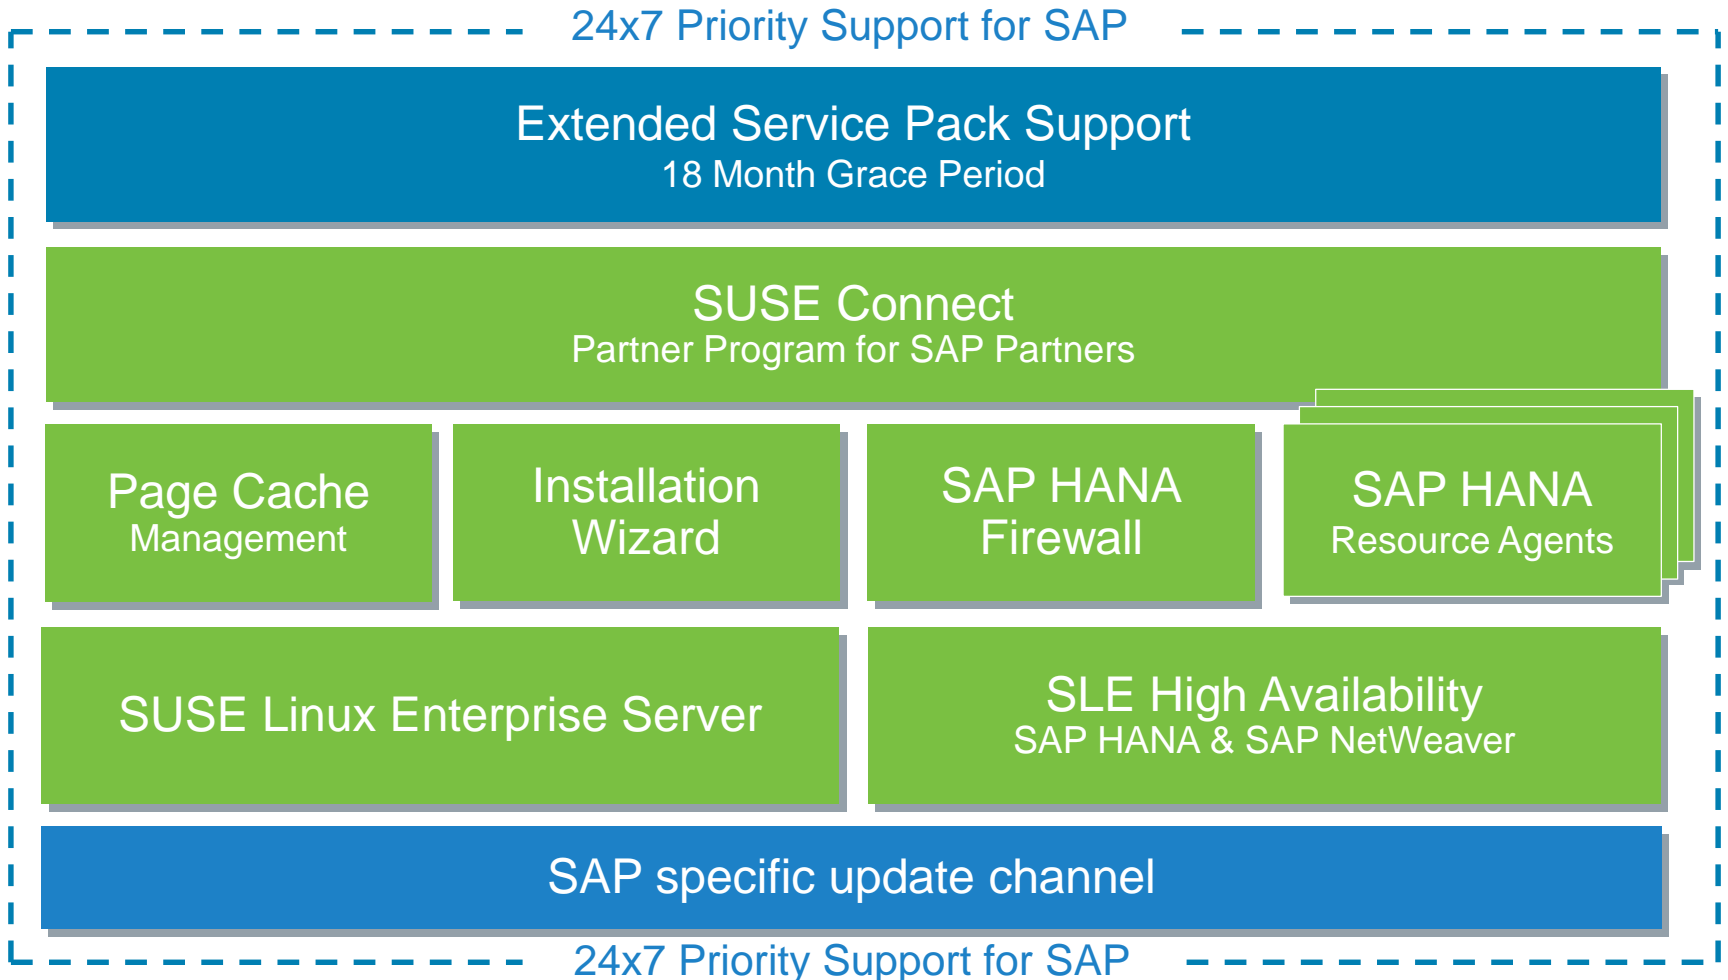

System administrators can now automate routine tasks which were executed manually before. SUSE delivers profiles for SAP HANA, SAP NetWeaver and other SAP applications, which can be changed to customize system parameters as needed. Administrators can also build and activate custom profiles.

### Leverage hardware enablement

Allow customers to run SAP solutions on new hardware platforms. This results in better usability of SUSE Linux Enterprise Server for SAP Applications 12 as a platform for SAP in-memory products like SAP HANA.

# Simplify Linux for SAP

## SUSE Linux Enterprise Server for SAP Applications

# SUSE in the SAP HANA Context

SUSE got a real head start

**SAP HANA developed on SUSE Linux Enterprise Server**

**“Majority” of SAP HANA customers run on SUSE (95%+)**

**High availability for SAP HANA – SUSE leads the way (integrated with HANA System Replication)**

**17 SAP HANA benchmarks out – all on SUSE !**

**<http://global.sap.com/solutions/benchmark/bweml-results.htm>**

# What is the HANA on Power solution?

## For mission-critical 24x7 customer enterprise operations

- Tailored Data Center Integration (TDI) offering - *not an appliance*
- Highly Reliable, Available and Serviceable (RAS)
- On-Demand Capacity

## Customizable server options

- “IBM Power Systems Solution Editions for SAP HANA” scalable hardware configurations
- SAP HANA and SUSE Linux Enterprise Server All POWER8-based servers supported for production (POWER7+ Test/Dev only)
- Initial support for SAP HANA Business Warehouse (BW) only

IBM Press  
Announcement

# Other SUSE Solutions

# 2010 to Present

## Enabling an Always Open Data Center

### 2010

VMware partnership announced.

SUSE Linux Enterprise available on Amazon EC2.

### 2011

SUSE Manager released.

SUSE OpenStack Cloud launched.

SUSE Linux Enterprise Server for SAP Applications.

SUSE selected for use with SAP HANA.

### 2012

SUSE Linux Enterprise available on Windows Azure.

SUSECON launched in North America.

### 2014

SUSE joins Micro Focus.

SUSE Linux Enterprise 12 released.

### 2015

SUSE Enterprise Storage based on Ceph launched.

SUSE joins Cloud Foundry.

### 2016

SUSE CEO joins Micro Focus board.

# SUSE Manager

**Get improved usability,  
provisioning, power management  
and new IT compliance and  
security features.**

- Automate your Linux server management to increase productivity
- Reduce the complexity of Linux systems management
- Secure your workloads and ensure compliance

# SUSE Linux Enterprise Live Patching

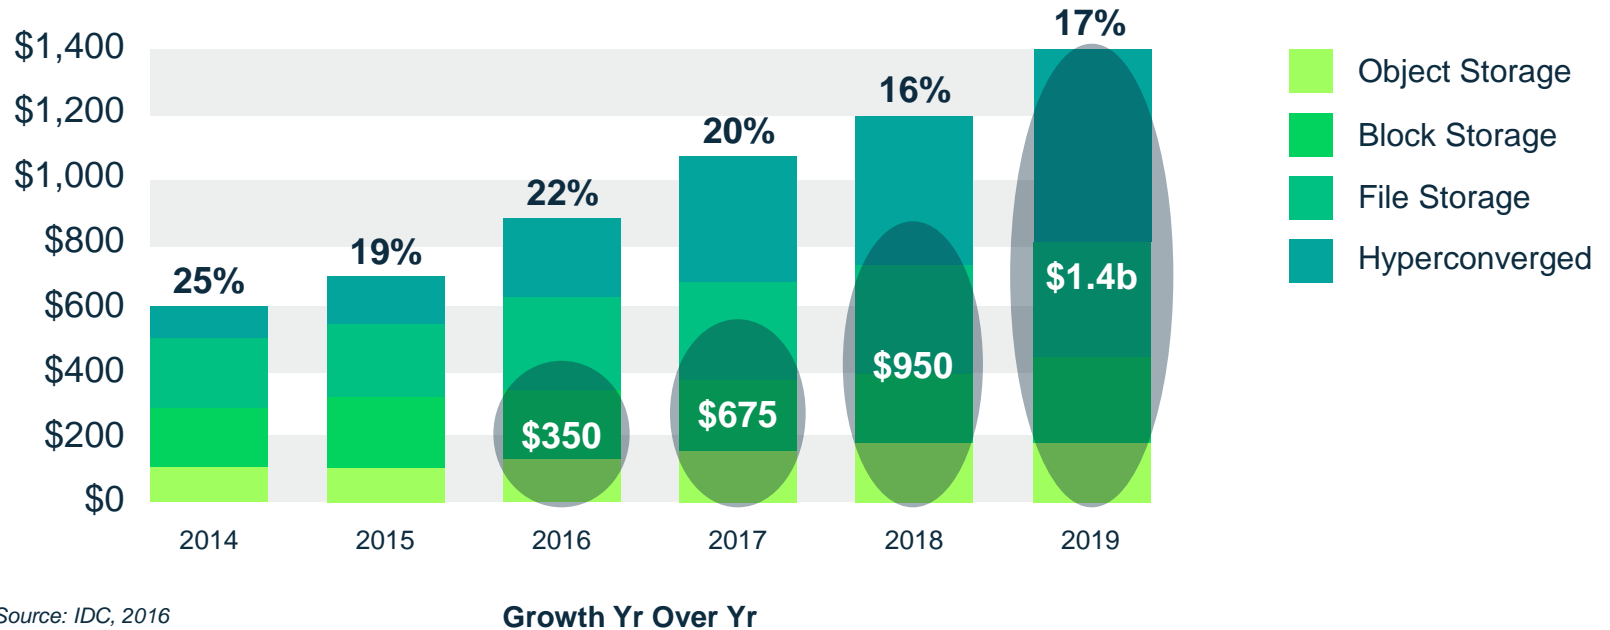

**Keep up with compliance and security, and increase your service availability while saving the cost of downtime. And apply kernel fixes on the fly—without interruption.**

- Minimize exposure to potential malicious attacks
- Ensures your workloads run without downtime
- Easily reuse your existing deployment methods

# Market Opportunity: Software-defined Storage

SDS Market by Segment 2014-2019 (\$m)

Source: IDC, 2016

# SUSE Enterprise Storage

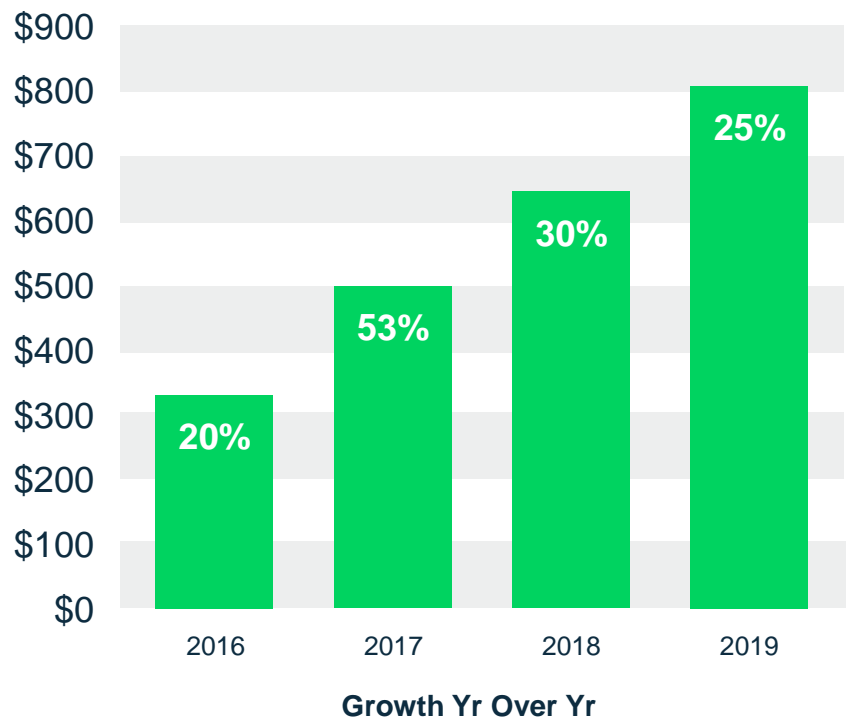

**Build cost-efficient and highly scalable storage using commodity, off-the-shelf servers and disk drives. It's a highly scalable and resilient software-based storage solution, powered by Ceph.**

- Reduce your capital expenditures
- Reduce your operational expenditures
- Adapt quickly as your business needs to evolve

# Market Opportunity: OpenStack Cloud

## SUSE Addressable Market (\$m)

Source: 451 Research, 2015

# SUSE OpenStack Cloud

**Building a private cloud with OpenStack doesn't have to be so hard. SUSE OpenStack Cloud makes deploying, upgrading, and supporting open source private cloud easy.**

- Deliver the agility required to meet business needs
- Scale your infrastructure and IT staff efficiently

It's not «if»... It's «when» and «how fast»...
